

• GLITCH GROW

Six production **AI agents.** Yours forever.

Buy once. Deploy in minutes. Resell to clients at \$1,500–\$3,000 a month.

- THE SHIFT

Stop ~~renting~~ your stack.

Every "agentic workflow" SaaS charges \$50–\$300 a month, per seat, forever — to wrap an LLM call you could have written yourself.

~~Zapier \$73/mo~~

~~Make.com \$59/mo~~

~~n8n Cloud \$50/mo~~

~~Relevance AI \$199/mo~~

~~Lindy \$99/mo~~

~~Vapi.ai \$0.05/min~~

- WHAT CHANGES

Own the agent.
Own the margin.

Source code on your GitHub. Runs on your infra. Wears your brand. No per-seat ceiling, no rate-limit ransom, no email saying *"we're sunseting this product."*

• WHAT WE SHIP

Six production-grade agents.

Everything. Source up.

- | | |
|-------------------------------|---|
| ✓ Source code | Private GitHub collaborator. No trimmed-down "showcase repo." |
| ✓ .claude/ config | Skills, agents, hooks, settings — exactly what we ship in production. |
| ✓ 9 MCP servers | Real API integrations Claude calls directly. Not prompt scaffolds. |
| ✓ Deploy recipes | systemd + nginx + GCE cloud-init + Cloud Run YAML + Docker. |
| ✓ Brand-config schemas | Switch a JSON file, ship the same agent under any client's brand. |

- DEPLOY IN MINUTES

Twenty minutes. **git clone** to live.

~/your-agency · agent deployment

```
$ git clone <agent-repo>
✓ ads-agent · sales-agent · social-agent
$ npx glitch-kit deploy ads-agent
⋮ provisioning gce + nginx + postgres
⋮ wiring meta + google + tiktok mcps
✓ deployed → https://ads.your-agency.dev
$ # bill your client $1,497/mo
```

- THE MATH

Five clients. **\$7,500 MRR.**

One agent. One weekend of setup. Recurring monthly revenue from day one.

CLIENTS						
5	×	PER CLIENT / MO		=	YOUR MRR	
		\$1,500			\$7,500	

- THE HIDDEN UPSIDE

Buy once. **Updates forever.**

Every patch, every new agent, every new MCP we ship — automatic, free, lifetime.

No SaaS bill that creeps up 20% each year. No "migrate to v2" upgrade fee. No vendor that gets acquired and shuts off your account.
